

HOW TO VOTE VIA MENTIMETER

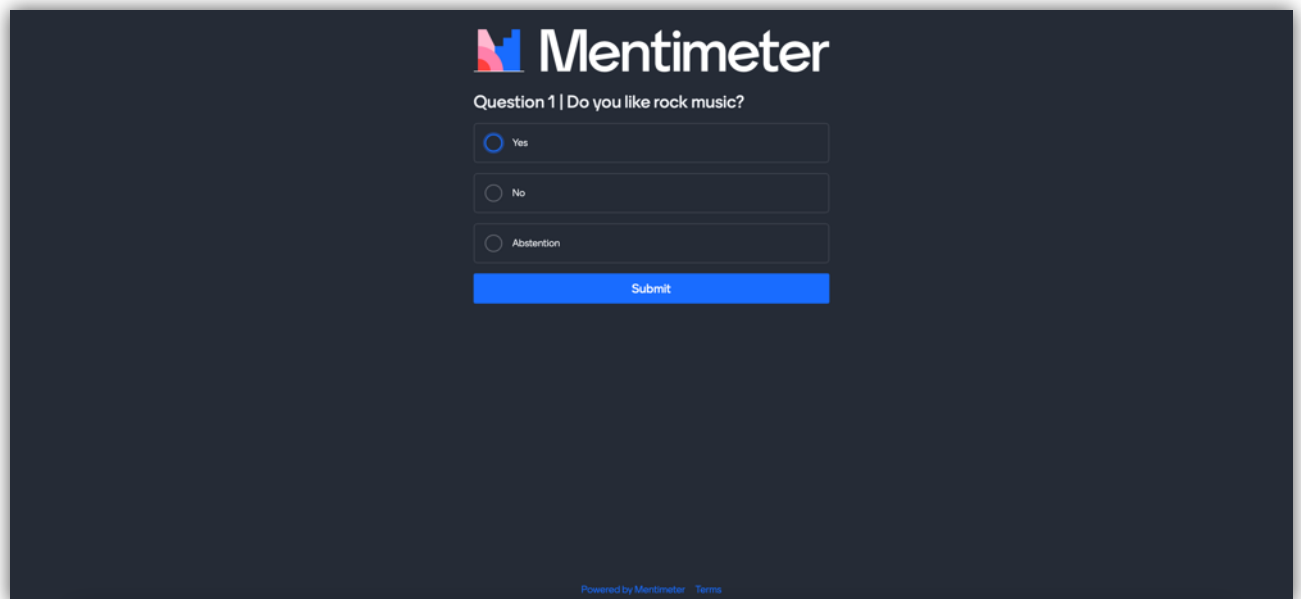

Via MS Teams screen sharing, your host will show you the topics that require voting.

Voting instructions will be shown: either go to menti.com and enter the 8-digit code (for desktop or laptop), or use the QR code to be directed to the voting area (for mobile devices with QR code reading option).

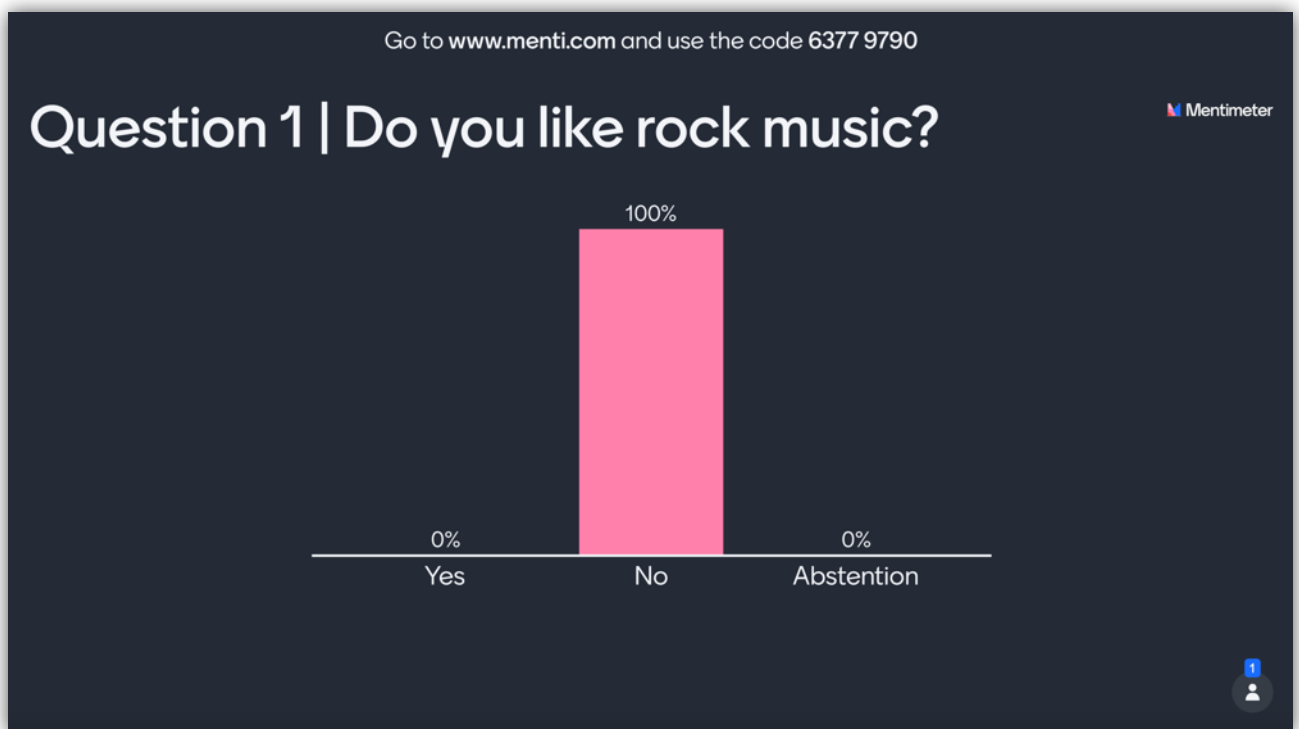

When using a desktop or laptop computer, go to menti.com and enter the 8-digit voting code to enter the restricted voting area.

You will see the first voting topic, with 3 options: Yes, No or Abstention

When you have cast your vote, you will be asked to wait for the presenter to show the results.

Once all votes are cast, the results of the online voting will be shown. Note that these results do not include proxy votes. These will be shared with you and added to the online results by your host.

As soon as these steps are completed, you will be shown the next topic that requires your vote.
